0.0

This transaction is a result of a reduction in weeks of service. The department will enlist the assistance of a qualified marine consultant to identify potential reductions of the State's financial obligation and/or liability as they relate to the Alaska Marine Highway System (AMHS). The project will include an analysis of options available for reshaping the system, such as through a public/private partnership, and a determination of the various options' feasibility, with targeted implementation by July 1, 2020. The ongoing trend of a less than 35% fare box recovery rate coupled with low passenger and vehicle ridership has contributed to making the AMHS an increasingly expensive system to operate. AMHS will move towards other service options to realize short and long-term cost savings for state government and to promote economic growth in affected regions of the state.
